USER GUIDE FOR MGCD MODEL B

MGCD-B is the reformed type of MGCD. With the original characteristics of MGCD, it has additional interface for DC Memory card to strengthen the system, and improve its stability. MGCD-B has the type without casing, and the DIP SW is set up directly on the P.C Board, more convenient to use.

1. GUIDE FOR DC MEMORY CARD:

For FTG, ACT, RCG and SPG games, insert the Memory Card into the DC Memory Card plug of MGCD-B P.C Board. For Gun shooting games, connect the Memory Card to C or D port of DC console with control pad.

2. 1P. 2P WIRE CONNECTION:

For FTG, DCT, RCG and SPG games, always connect the IP wire to the DC 1 (A) port.

2P wire to 2 (B) port or (D) port or none, (depends on the games)

For instance: when running Virtua Tennis, connect 1P to A port, 2P to B port of the DC console, and Memory card on the MGCD-B P,C Board.

3. ATTENTIONS:

- 1. MGCD uses -5 voltage. When using MGCD-B, please make sure the -5 voltage is connected to the JAMMA connector.
- 2. When maintaining: all the ICs with programs on the MGCD-B are different from those on MGCD, so please never exchange to use.
- 3. When using PS2 or PS consoles, please take out the DC memory card.

4. OTHER OPERATION INSTRUCTIONS ARE THE SAME AS MGCD.

MGCD-B MAIN BOARD CONFIGURATION

HOW TO USE MGCD

- 1. To use, insert 110V AC power into console. Then insert hand controller of 1P and 2P with RGB cable into the MGCD connector. Turn on Console power. Caution: 1P and 2P is different do not insert wrongly.
- 2. For credit feature, before turn power on, push 1P start button then turn on power, monitor screen will display credit amount, when released the game can normally be played.
- 3. Game title setting (8 DIP switch): push titles switch to the correct location. Insert CD into console, turn on power, monitor screen display the selected title number. Yellow character SC:XX indicate DC titles, Yellow SS:XX indicate SS titles. Green Character PS:XX indicate PS titles, title number will disappear after title is started. If not, match the hand controller cable, RGB cable and CD if they are correct.
- 4. Feature location switch (12 DIP Switch):
 - A. Time mode setting: K3 on position is timing mode, K5-K12 is time setting switch K5-K12 off position indicate 1 minute for a credit, K5 on position additional 1 minute, K6 on position additional 2 minutes, K7 on position additional 4 minutes, K8 on position additional 8 minutes, K9 on position additional 16 minutes, K10 on position additional 32 minutes, K11 on position additional 64 minutes, K12 on position additional 128 minutes, All K5-K12 on position 256 minutes every credit.
 - K3 on position, timing mode start game, insert coin, location setting under option
 - B. Credit mode setting: K4 on position, K3 off position is credit mode, when power turn on, switch automatically become menu for certain item.
